

UPEI Biology Seminar Series

2009-2010

Tuesdays 10-11am, Duffy Science Centre, Room 204

Sept 22 **Dr. Jennifer Slemmer**

Validation of potential human health benefits of functional foods produced on Prince Edward Island

Oct 6 **Dr. David Cairns**

Endothermy, ectothermy, and global structure of marine vertebrate communities

Oct 20 **Kevin Sanderson**

Trimmer technology becoming industry standard in agriculture

Nov 3 **Dr. Mike van den Heuvel**

Environmental androgens: are fishes uniquely sensitive?

Nov 17 **Sharon Labchuk**

The Party's Over: What's Plan B?

Dec 1 **Meghan Smith**

The developmental timeframe of prepulse inhibition deficits in rats treated neonatally with domoic acid

Christina Pater

Structural components of eelgrass beds in PEI estuaries with focus on the relationship to fish communities

Jan 12 **Kerry-Lynn Atkinson**

On the brink of extirpation: recovery strategies for the Gulf of St. Lawrence Aster on Prince Edward Island

Meghan Marriott

Lost and found lady beetles: does the arrival of non-native species coincide with the decline of native species?

Jan 26 **Dr. Karen Samis**

From the centre to the edge - why variation across a geographic range matters

Feb 9 **Eva Jenkins**

Red fox movement patterns on Prince Edward Island

Bob Deziel

Cranberry proanthocyanidins inhibit matrix metalloproteinase activity in DU145 human prostate cancer cells

Mar 2 **Dr. Spencer Greenwood**

Lobster DNA microarrays: fishing for biomarkers

Mar 16 **Dr. Carolanne Nelson**

Celiac Disease - an epidemic in our own backyard?

Mar 30 **Dr. Russ Kerr**

Marine organisms as a source of new therapeutics - the promise and the challenges
