

Subnode 2: Inclusion and Empowerment – “Mapping supports for the social economy on Prince Edward Island”

The intent of the project is to measure the extent and impacts of changes to federal and provincial government supports for social economy organizations on Prince Edward Island. The research project will provide a greater awareness of these supports by identifying changes in available of funding as well as changes in policy at the federal and provincial levels that have an impact on local social economy organizations and their work.

The research questions this project will ask are: what federal and provincial funding programs exist to support social economy organizations on PEI, and especially for those involved in empowerment and inclusion of marginalized members of society? What changes have occurred in the level of federal and provincial supports and what have been the effects of these changes on PEI’s social economy?
