**DEPARTMENT OF MODERN LANGUAGES**  
**SPANISH 102: INTRODUCTORY SPANISH II**  
**FIRST SUMMER SESSION 2008**

**Instructor: Dr. Doreley C. Coll**  
**Office: Main 328**  
**Phone: 566-0603**

**Classroom: Main 237**  
**Office Hours: T TH 17:00**  
**e-mail: dcoll@upei.ca**

**DESCRIPTION**

Spanish 102 is the continuation of Spanish 101. The course will further develop the language structures introduced in the first semester. Students are exposed to the fundamentals of the Spanish language by a) engaging them in classroom and language laboratory settings, b) in communicative use of the four language skills: listening, speaking, reading and writing and c) to become familiar with the Hispanic culture. Students will have to attend the Language and Computer Lab one hour a week. They have to sign in for a lab time and are not allowed to change times or teaching assistants. The lab work consists of audio/lingual exercises and computer assisted learning. The Language Lab is located on the third floor of the Main building. Learning a new language is a challenging and rewarding experience. The learner must be exposed to the sounds and rhythms of the target language as much as possible in order to familiarize her/himself with it. The introduction to the course and explanations of grammar will be in English, but Spanish will be used increasingly in class as the course proceeds and students acquire greater facility with the spoken language. Students will not progress without attending and participating regularly in class. If tests, quizzes or assignments are missed, substitutes will not be given. If the absence is for medical reasons, the instructor must be informed and provided with a medical certificate so that alternative arrangements can be made. Students are highly recommended to participate in the cultural activities available through out the semester: *Tertulia*, movie night, etc. There will be three movies during the term. Students are expected to attend at least one of the movies.

**OBJECTIVE**

Upon successful completion of the course, the student will be able to:

Use phonological, lexical and grammatical features of Spanish.

Sustain a conversation on general basic topics.

Ask and answer questions.

Demonstrate knowledge of Hispanic culture by using appropriate style, form and vocabulary in conversation.
